Subject Index to Volume 6

Adrenal cortical activity, in chronic schizophrenics, 23ff
Affective disorder, sex ratio in relatives of patients with, 307
Aggression
  effects of fenfluramine on, 181ff
  pharmacological study of, 143ff
Amino acid levels, effect of loss of PS on, 37

Behavior, effect of norephinephrine and serotonin on, 3ff
Bennett Award, of Society of Biological Psychiatry, 143ff
Biological psychiatry, a rationale for, 174
Books Received, 201
Brain amine levels,
  and aggression, 148ff
  effects of α-methyltyrosine on, 301ff

p-Chlorophenylalanine, 3ff
  and aggressive behavior, 143ff

Dehydroepiandrosterone, level in schizophrenics, 33ff
Depression, and phenylethylamine, 235ff
Dextroamphetamine, effect on speech, 93ff
DMPEA, metabolites of, 187ff
L-Dopa, effect on sleep, 295ff

Dopamine
  and aggression, 143ff
  and psychotic symptoms, 165ff
  in schizophrenia, 215ff
Down's syndrome, evoked responses in, 75ff
Dream recall, after lobotomy, 275ff
Dyskinesia, and sleep, 259ff

Echoencephalography, and schizophrenia, 129ff
Editorials, 1, 107, 205
Environmental change, effect on [^{3}H] *d*-amphetamine distribution, 85ff
Evoked potential, correlation with psychopathology, 45ff
Evoked response, and marijuana, 221
Evoked responses
  in Down's syndrome, 75f
  in retardates, 75ff

Fastigial nucleus, bilateral pathway to rostral septal region, 193ff
Fenfluramine, and aggression, 181ff
Fertility, effect of lobotomy, 97ff

Homeostasis, effect of drugs on, 172f
Homosexuality, and frontal lobotomy, 100
Homosexuals
  androgen metabolism of, 23ff
  sleep in, 81ff

© 1973 Plenum Publishing Corporation, 227 West 17th Street, New York, N.Y. 10011.

Lobotomy
dream recall after, 275ff
effect on sexual behavior, 97ff
LSD-25, effect on speech, 93ff

Marijuana, effect on evoked response, 221ff
Mental retardation
evoked responses in, 75ff
sleep in, 295ff
Mescaline, behavior changes in mice, 177ff
Metabolism, in schizophrenia, 215ff
Methionine, in schizophrenia, 215ff

News and notes, 105, 197, 311
Norepinephrine
and aggression, 143ff
effect on behavior, 3ff

Parkinsonism, and dopamine, 165ff
Pharmacology, in psychiatry, 171ff
Phenylalanine
and depression, 235ff
in schizophrenics, 109ff, 119ff
Placebo effect, in sleep, 89ff
Psychiatry, and pharmacology, 171ff
Psychoses, and dopamine, 165ff
Psychotherapy, effect of drugs on, 93ff
Psychotropic drugs, effect on evoked responses, 45ff

Rabbit syndrome, during sleep, 259ff
Rapid eye movements
and dyskinesia, 273
effects of α-methyltyrosine on, 301ff
effects of L-dopa on, 295ff
in lobotomized patients, 284ff
Reward mechanisms, effect of chemicals on, 3ff
Rostral septal region, pathway to fastigial cerebellar nuclei, 193ff

Schizophrenia
and dyskinesias, 261
androgen metabolism of, 23ff
blood plasma levels in, 109ff
dream recall after lobotomy, 275ff
echoencephalography in, 129ff
enzyme activity in, 215
evoked potentials in, 45ff
tryptophan levels in, 119ff
Serotonin, effect on behavior, 3ff
Sex, ratio in affective disorder, 307ff
Sex behavior, effect of lobotomy on, 97ff
Sleep
amino acid levels in, 37ff
deprivation, 41
effect of marijuana on, 207
effect of placebos on, 89ff
effect on dyskinesia, 259ff
in homosexuals, 81ff
motor phenomena during, 291
Speech, effect of drugs on, 93ff

Tryptophan
in schizophrenia, 119ff
levels in schizophrenia, 109ff
Tyrosine, in schizophrenia, 109ff, 119ff
